

The Best Wheat and Mixed Farming Lands in Alberta

VOL. III NO. 24

CHINOOK, ALBERTA, JULY 27, 1916

Subscription: \$1.00 per year, in advance. Single Copy, 5 cents

## Chinook Fair, August 9th

## Breezelets

The New Jerseyites over there on Uncle Sam's domains are making a great blow about that Common man-eating shark playing hide-and-seek along their coast.

That's nothing, Alberta has got one over them, alright. We can boast of a whole shoal of sharks—land sharks, oil sharks, political graft sharks, wheat sharks &c., &c.

But the Germans wish there was a "to have and to hold" clause in their title to certain French and Russian lands they have been occupying.

Heat by some is called torrid; by others horrid.

With sharks so prevalent at the seaside, fresh water bathing will get quite a boom.

It is safe to predict that there will be no laws made to limit shark hunting to certain periods of the year. It is not a game that many will want preserved for sporting purposes.

Speaking of a counter attack, did you ever attend a bargain sale?

A bear hug on an empty stomach is a tolerably accurate statement of Germany's experience just at present.

Rumania is still making money out of Russians, Austrians and Germans and keeping hostilities at arm's length. It is fine while it lasts. But when the war is over there may not be any space on the map marked "Rumania." Neutrality has its dangers as well as war.

And now it is reported to have been diamonds that the Deuschland carried.

Diamond dyes!

Great Britain is still Mistress of the Seize.

The offensive in France appears to answer Winston Churchill's question as to where Great Britain's 4,000,000 men have gone.

The Russians appear to be getting Hungary!

## R. M. of Golden Centre, No. 272

The 7th meeting of the above council was held at L. C. Michael's Wednesday, July 5th. Members all present. Minutes read and confirmed. Communications read and disposed of.

Following accounts ordered paid:

D. G. Ennis, rep on bridge	\$ 7.50
W. E. Tait, fee and mileage	19.80
H. G. Logan	10.00
J. R. McConnell	13.40
R. O. Morrow	11.40
C. C. Wilson	13.20
Robt. Gardiner	13.20
N. D. Ross, 3 mos. salary	12.50
Ralph Greene	212.50
L. C. Micheal, rent	15.00
M. Danielson, trip weed	25.20
D. G. Ennis	25.30

Account of Mr. McKinstry was tabled till next meeting and he be asked to attend.

Wilson to instruct Bailiff Baker to secure from L. K. Berg an affidavit that he owns machinery seized for taxes on Geo. Ade's farm, or a statement signed by witnesses that he bought machinery from Geo. Ade.

The three bailiffs made reports and were accepted.

McConnell, to instruct Bailiff Ennis to immediately follow instructions given last meeting.

Wilson, to rebate to J. Ditchon costs paid in excess of \$2.00.

Logan, to strike off appraiser's fees in case of John Detchenon, on grounds did not see horses on date when appraised.

Wilson, to instruct appraisers to be very cautious in appraising property seized for taxes.

Wilson, that amounts due to school districts be paid as taxes are collected.

The credit at bank was divided \$4,000 for genl. fund and \$6,000 for school fund.

Court of revision was held.

Minimum assessment in town. 30 was lowered from \$7.00 to \$3.50.

s. hf 25-30-5	from \$7.00 to \$ 3.50
s. e 35-30 4	14.00 to 10.00
s. e 24 30-5	12.00 10.00
n. w 27-29-4	14.50 13.50
s. w 19-30-4	12.00 10.00
n. w 10-30-5	11.00 10.00
e hf 12-29-5	10.00 8.00

Following assessments were sustained: n. e 17-29-4 and s. w 7 29-4

Reports of weed inspectors Ennis and Danielson accepted

McConnell, that Secretary secure price on 16 ft 6 in green cut

(Continued on page 8)

## 'Tish't All Joy!

## THIS AUTO RIDING—ALTHOUGH IT AUTO BE

Among the many trials and tribulations that beset the autoist a new one developed in town one night, or rather early in the a.m. last week. To make sure of the "pesky thing" going right and not stopping when half way home the chauffeur purchased an extra five gallons of gasoline and filled up the auto tank. So far so good. But, no, for it was here where the whole trouble began. The auto came to town all right. So when all was ready for the return home the chauffeur, not suspecting what was ahead, turned on the starting switch; but there was no response. Turning it off again, the switch was cautiously turned on once more—the turning was O.K., but still there was no buzzer—not even the wink of a skeeter could be heard. The same process was repeated again, but, no, not a sound—only what the chauffeur uttered. We weren't there, so cannot say whether it was English or some of names of those towns the Slavs are capturing in their drive east. Next the chauffeur examined the balky brute from head to foot, trying all the persuasive arts known to the autoist, but still the pesky thing wouldn't budge—no, not even so much as a throb of a dead goat's tail. Far in the eastern horizon signs of break of day were visible and the chauffeur was still in town alone with his inanimate steed—and his own thinks, and from the near by sloughs the frogs were singing their cheerful morning hymns, but there was no "honk!—honk!" from the auto. As a last resource the aid of Chinook's auto expert at the garage was requisitioned, and a few minutes' examination he discovered that the tank had been filled with kerosene instead of gasoline! Old Sol was smiling down upon the scene by the time the kerosene had been pumped out and the tank cleaned and a fresh supply of gasoline taken aboard, and the home journey completed.

## Everybody Welcome

The Rev. Arthur Barner, supt. of Western Missions, will give a special address at the Chinook Sunday School next Sunday morning, and will also conduct the evening service. Cordial invitation is extended to all to attend both services.

## Chinook Breezes

Mr. J. M. Davis left last week end to take the sulphur baths at Banff for rheumatism.

The fair prize lists are out. Ask the Secretary for one if you do not get yours

McLean—At Chinook, on Monday, July 17th, to Mr. and Mrs. Neil McLean, a son.

Brownell—At Chinook, on Thursday, July 27th, to Mr. and Mrs. C. R. Brownell, a daughter. We regret to learn since the above was in type the baby girl has died.

## Dollar Mark Reached

Wheat reached the \$1.02 mark at the Chinook elevators on Monday, but dropped to \$1.00 for a few days since.

## The Lure of the West

Mr. and Mrs. Bradford from Eastern Ontario, brother of Mrs. W. A. McLaughlin, came to Alberta to look over the country, recently, and was so pleased with the prospects, that Mr. Bradford decided to stay, and has purchased half section of Hudson Bay land, and is now breaking as much as possible this season.

## Just for Girls of 16 and Under

In the Chinook prize list a special prize was accidentally left out. The special is offered by the Chinook Women's Institute for the best collection of baking by a girl of 16 or under, consisting of bread, pie, layer cake and baking powder biscuit. First prize \$5.00, second prize \$3.00.

## Chinook's New School

The tenders for Chinook's new consolidated school, as will be noticed in the school trustees minutes, has been let. Mr. Pettifer's tender for \$15,000 was the lowest, the next being \$17,850. Mr. Pettifer supplies his own plans, which were approved of at a former meeting of the trustees. It is said when completed it will be one of the best and most modern schools along this line, bar none. Later, we intend to procure a cut of the building as it will appear externally, and also to give a general write-up of both the exterior and interior of the building. It will be completed as early as possible. Mr. Pettifer sr., is at present in Chinook, getting the gravel and material for foundation on the spot in readiness, and also making arrangements for excavating the basement, and other material and also labor lined up.

## Agriculture

## IN THE SCHOOL

In the public schools of most the provinces of Canada, nature study and agriculture are included in the prescribed course of work, but the opportunity of correlating school subjects with practical life on the farm is not always fully utilized. In rural and village schools, particularly, the interest of children in their school work should be aroused and held by its intimate contact with agriculture. A few suggestions are offered herewith for impressing upon the pupils the utility value of the subject taught.

In connection with the teaching of arithmetic the following topics might be used as a basis for problems and general instruction:

Neat methods of compiling farm records, e.g. milk and egg production; receipts and expenses time sheets, etc. These records will form the basis for numerous problems. Cost of produce, rent labour, wear and tear of machinery; marketing of farm products, computation of profits; mensuration of fields, wood-piles, lumber ice houses, etc.; invoices, cheques receipts and commercial forms; taxation; mortgages.

The teaching of reading and the study of literature offer exceptional opportunities for arousing the interest of the pupil.

## Rubbish Heaps

## MANY FIRES TRACEABLE TO SUCH ACCUMULATIONS

More fires originate in rubbish heaps than from any other source. To permit rubbish to remain in the building not only invites a fire to visit your home or place of business, and render your family temporarily homeless, or cripple your business at a time when you can least afford it, but also endangers the lives of your family or employees. In addition to destroying an average of \$23,000,000 in property value in Canada each year, fire caused the death of 141 persons last year. The home is built to protect our loved ones, and we want to do everything to insure absolute protection to those who live in it. That rubbish heap in the attic, storeroom or basement is menace to your household, because there is always a possibility of fire starting in it, and it may start when least expected.

Consider what might happen, and then without delay, eliminate the menace of the rubbish heap.

## Chinook Consolidated S.D. No. 18

## TENDER LET FOR SCHOOL BUILDING

The board of trustees of the above school district was held on Saturday, July 22nd.

All members present. Minutes read and adopted.

The following accounts were ordered paid:

A. E. Roberts, con. children	48.00
R. A. Morin	"
C. R. Brownell	114.00
Jos. Deman	120.00
E. B. Mills, caretaking	10.40
Alice Deman	12.00
Western Municipal News	4.68
O. D. Dunford, ex. paper	1.00
Edmonton Bulletin, advt	9.90
Chinook church, use of building for exams	5.00

Young, that board of trustees approve of action of Chairman and Secretary having paid to Public Utility Commissioners \$30.00 fee in connection with de-benture issue.

Maris, that advt for teacher for junior or intermediate classes be sent to the Calgary Herald, salary \$750 per year.

Bennett, that Pease system of heating be installed in new school that cement walk as specified in specifications be laid from front of school to street, no cement walks for sides and rear of building, that galvanized iron 26 guage be used rather than brick for ventilating flues, and that with these changes in the specifications Mr. C. W. Pettifer's tender for \$15,000 for construction and completion of building be accepted.

Meeting adjourned to meet on July 31st.

## Boys, Get In On This!

We notice by the Calgary papers that the 175th are opening up a recruiting office this week in Calgary, as 85 more recruits are needed to complete the battalion. Here's a chance for some more from Chinook and surrounding district to get in with their chums and fellow Chinookers, as there is already a number from this neighborhood in this battalion. Mack McColl is recruiting along this line for the present and has succeeded in getting some towards the 85 needed. There's room for you yet, but you've got to be Johnny on the spot at once.

## TOO LITTLE BLOOD MEANS MUCH MISERY

That is What Makes People Pale, Weak and Languid.

The one source of most of the misery that affects men and women and growing children, is poverty of the blood. If you consult a doctor he says you are anemic, which really means bloodless. That is what makes people drag along, always tired, never real hungry, often unable to digest their food, breathless after the slightest exertion, and too often on the verge of complete breakdown.

More weak, anemic people have been made strong, energetic and cheerful by taking Dr. Williams' Pink Pills by any other means. These pills actually make new, rich blood which reaches every part of the body, strengthens the nerves and brings new health and strength. The following is proof of Dr. Williams' Pink Pills to restore health. Mr. Geo. Turner, New Haven, N. S., says: "No doubt due to constant hard work, I got into a badly run down condition. It took very little exertion to tire me, and my appetite was far from being good. Often I had headaches, and when going up stairs, or after any slight exertion my heart would palpitate violently, and I grew considerably alarmed about my condition. I decided to take Dr. Williams' Pink Pills and after using a few boxes I felt much better. I continued using the pills for some weeks longer, and they completely cured me. I can warmly recommend this medicine to men who are weak or run down."

You can get these pills through any medicine dealer or by mail, post paid at 20 cents a box, or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

## Forestry Farms

Changing the Treeless Prairie Into a Park-Like Country

"Saskatchewan requires more Forestry Farms. Then there would be at least two lectures continuously on the road to hold meetings, giving lectures on forestry, shelter-belts, etc. The gospel of forestry should be brought to farmers. These lectures could take the names and locations of farmers who are anxious and ready to plant trees, send in the lists to the head office in the province, and inspectors should be sent out to examine each farm, so as to advise farmers where to plant, and how to prepare the ground for the following year's planting. It is all right to spend money on the general conservation Commission to entice citizens the Dominion over on what our natural resources are, and how they should be conserved, but the practical working end of the problem should be solved. Give Saskatchewan forestry farms and practical men to meet progressive farmers, and in a few years the treeless prairie and prairie would be changed to a park-like country, with trees on every farm."—Saskatchewan Farmer.

## Foe Ships in American Harbors

There are eighty-eight German and twelve Austrian ships in American ports with a total net tonnage of 285,479, lying idle on account of the war. The merchant ships may leave when they like, but warships must remain till the termination of the war. The reason why none of the merchantmen leave port is because they have to maintain an effective patrol outside the three mile limit.

## Capital of Portugal

Lisbon, the capital of Portugal, has a population of about half a million. Its harbor is one of the finest in the world, and large enough to hold all the navies of Europe. The greatest earthquake on record occurred at Lisbon when, in 1755, in the space of a few minutes, the greater part of the city was made a heap of ruins, and from 30,000 to 40,000 persons killed.

## Defeat

What is defeat? Nothing but education, nothing but the first step to something better.

## In this Matter of Health

one is either with the winners or with the losers.

It's largely a question of right eating—right food. For sound health one must cut out rich, indigestible foods and choose those that are known to contain the elements that build sturdy bodies and keen brains.

## Grape-Nuts

is a wonderfully balanced food, made from whole wheat and barley. It contains all the nutrient of the grain, including the mineral phosphates, indispensable in Nature's plan for body and brain rebuilding.

Grape-Nuts is a concentrated food, easy to digest. It is economical, has delicious flavor, comes ready to eat, and has helped thousands in the winning class.

## Feeling the Pinch

The Truth About the Food Question in Germany

A well informed writer in England writes of the question of the reorganization in Germany for the regularization of food supplies. He says that his information leads him to the conclusion that it is almost too late to begin any such effort. A political question has sprung up in the Fatherland which is almost too late to begin any such effort. A political question has sprung up in the Fatherland which is almost too late to begin any such effort.

The new policy will deepen the feeling, inasmuch as the demands of Berlin are so loudly heard in government circles, and Berlin is so much the centre of news that is circulated broadcast throughout the world, that supplies for that city will continue to be exported at the expense of the needs of the country.

Many of the large cities in the south and southeast have passed by, including the export of foodstuffs to Berlin. Small towns follow their example—in fact, some of the foodstuffs are being sent away, including the export of foodstuffs to Berlin. Small towns follow their example—in fact, some of the foodstuffs are being sent away, including the export of foodstuffs to Berlin.

However, in particular, is in a very critical mood. The stock of the farmers is in a state of panic, owing to the impoverishment in the winter, and has resulted in many being killed that, otherwise, would have fished good prices.

"We have the money to meet the rise in prices, but not the goods. We eat our potatoes with a sausage and since private slaughtering is forbidden, we in the country are meatless. The various tendencies mentioned will continue to be more pronounced as long as the war lasts. There has been in recent years in Canada, a steady increase in the acreage yield per acre of most crops, but a considerable improvement is not possible. As a rule intensive farming is more profitable than extensive. Less labor is required, less capital is employed and the returns are surer. A decrease in the number of acres cultivated need not always mean less production. Now it is the time to economize in labor on the farm when men are needed so badly abroad."

Minard's Liniment Cures Distemper.

## Meat Production

In the United States between 1900 and 1913 the population increased 24 per cent, while cattle decreased 30 per cent. In Russia agriculture has been looked upon as one of the emporiums of the empire, and now we are the verge of a collapse and the food of food for cattle and edibles for the poor. The poor will die like bees before the price of meat is raised. It is said that the harvest will be great. That was said last year when the authorities at Berlin knew all the time that the harvest was unprecedented.

It Will Cure a Cold—Colds are the common ailments of mankind and if neglected may lead to serious conditions. Dr. Thomas' Electric Oil will relieve the most distressing passages of inflammation speedily and thoroughly and will strengthen them against subsequent attack. And as it eases the inflammation it will stop the cough because it allays all irritation in the throat. Try it and prove it.

Italian Royalty's Narrow Escape Italy's Queen narrowly escaped raiders who dropped bombs near the train on which Queen Helena and the Princesses Jelanda and Haralda were travelling. The royal party was on the way from a section of the front to Venice when the Austrian aircraft made the attack. The lights in the train were extinguished and the railroad line was in darkness, but despite these precautions bombs fell on the line near the train, breaking telegraph wires.

Minard's Liniment Cures Garget in Cows.

A Back Door Dodge When German meets German then comes the tug of war. The butchers of Cologne do not at all care for the State organization of meat supplies. One enterprising son of "Kultur" meted out a lot of meat to his premises and sold it to "good customers" at the back door. When faced with the discovery, the butcher pointed to the regulations which specified that the restrictions only applied to meat sold over the counter. The law has been made more specific.

Protect the child from the ravages of worms by using Mother Graves' Worm Exterminator. It is a standard remedy, and years of use have enhanced its reputation.

Cursew (entering office): "I've an attachment for your typewriter, which I— Busy Man: "Well, settle it with her. Your love affairs are no concern of mine."

## They All Went Away Together

P. A. BONNOT'S RHEUMATISM CURED BY DODD'S KIDNEY PILLS

And With It Went All Those Symptoms Which Mark the Earlier Stages of Kidney Trouble.

Grand Clairiere, Man. (Special).—"All persons who suffer from rheumatism should use Dodd's Kidney Pills." This is the statement volunteered by Mr. P. A. Bonnot, a well-known resident of this place. Asked to give the reasons why Mr. Bonnot said:

"I suffered for three years from rheumatism, a constant doctor without getting any results. Four boxes of Dodd's Kidney Pills fixed me up."

That rheumatism is caused by sick kidneys failing to strain the uric acid out of the blood was shown in Mr. Bonnot's case. His earlier symptoms were: heart fluttering, broken and unrefreshing sleep, fluff appetite, a great nervous feeling, heaviness after meals, neuralgia and backache.

When he cured his kidneys with Dodd's Kidney Pills the rheumatism and all the other symptoms of kidney trouble disappeared.

## Agriculture and the War

One effect of the war has been to bring home to peoples' minds the real importance of agriculture as an industry.

The farmer is benefited by the situation in that the prices of agricultural products have been greatly increased, but he is at a great disadvantage in that the cost of living is so high in many places and the consequent rise in wages and in the cost of farmer's materials.

These effects have been more marked in the second year of the war than in the first. In all probability the various tendencies mentioned will continue to be more pronounced as long as the war lasts.

There has been in recent years in Canada, a steady increase in the acreage yield per acre of most crops, but a considerable improvement is not possible. As a rule intensive farming is more profitable than extensive. Less labor is required, less capital is employed and the returns are surer. A decrease in the number of acres cultivated need not always mean less production. Now it is the time to economize in labor on the farm when men are needed so badly abroad."

## Stamps as Spy Messages

Arranged to Convey Information of a Naval or Military Nature

The Italian Government has forbidden the exportation and the German Government the importation of used and unused postage stamps, according to information received from St. Petersburg by Hugh Clark, a New York philatelist.

American dealers' supplies of stamps from Italy are thus suspended, and those from Germany are delayed because they must come by way of Roumania and the Orient, whereas formerly they reached here by way of Italy.

The British Government does not permit German stamps to be sent out by way of Holland or the Scandinavian countries, and the French Government is equally strict.

The letter received by Mr. Clark carried the intimation that two secret codes built upon the use of postage stamps sent through letters had been discovered by the Italian and German authorities, and that these were responsible for the respective decisions of the two governments. Through these codes certain numbers and types of stamps, imported or exported, were said to be conveying information of a naval or military nature.

## ACHING BONES AND SORE JOINTS CURED! ALL RHEUMATIC TENDENCIES DESTROYED!

Away Go the Crutches,  
Every Sufferer Made  
Well Quickly

Old age is usually afflicted with rheumatism. Very few past fifty escape its tortures.

Many it bends and deforms. Upon the countenances of old men it marks the effects of its awful suffering.

Nervine will cure rheumatism. It takes the pain out of throbbing muscles and swollen joints. It cures aches and pains. It does this quickly and surely.

Nervine is not used internally. You just rub it on—lots of hard rubbing is required for a minute or two, and then

you feel Nervine penetrating through the tissues; you feel it drawing out the congestion, feel it sink in deeper and deeper till at last it touches the core of the joint or the heart of the muscle affected.

You won't stay in pain with Nervine—no one ever does. Just try it. You will be amazed at its medicinal power over pain, a power it gets from the extracts and juices of certain rare herbs and roots it contains. It's harmless—any child can use Nervine, can rub it on for a sore throat, for a bad cold, for stiff neck, for earache. No fam-

ily remedy half so useful.

The large 50 cent bottle is the most economical; trial size 25 cents. All dealers, or the Cataract House Co., Kingston, Canada.

## Baker's Bread in Great Britain

"The ordinary whitened bread has on occasions when analysed been found to contain as much as 10 per cent of alum, sulphuric powder and salts or magnesia, which enables the flour to take up far more than the normal amount of water. As this emulsified flour known in the trade as 'seconds' is naturally of a grey and unattractive color, it is put through a process of bleaching in order to endeavor to give it the look of pure fine wheaten flour. There are two principal ways of achieving this, both processes highly injurious, especially to the digestive organs and teeth of children. One is the mixing of alum with the flour, the other bleaching it by means of chemical fumes. There is no law to prevent either, and no obligation to give the purchaser any maximum of what is in the loaf."—Dr. Wm. A. Broad in the Nineteenth Century.

## RAIDING THE ENEMY'S TRENCHES HAS NOT BECOME GRIM WORK

HAND TO HAND FIGHTING IN SURPRISE ATTACKS

The Monotony of Trench Existence Broken by Preparing for Raids, and in Affording an Opportunity for Our Soldiers To Get at Close Grips With the Enemy

Between the British and German modern machine warfare, wherein every man was supposed to have been a pawn without initiative of his own, has been developing perhaps the deadliest form of sport imagination can conceive—where every combatant places his cunning, his strength and his skill in hand-to-hand fighting against those of his adversary.

Hardly a day passes that there is not a trench "raid" or surprise attack, and sometimes several such sallies. No subject is more taboed in its details by the censor than trench raiding, but the enemy's commanders do not want it, for they know they will be successful or fail or why the enemy's success or failure, trench fighting, invention, secrecy fights secrecy.

All the elements of boxing, wrestling, fencing and modern tactics, plus the stealth of the Indian who crept up on a camp on the plain and the teamwork of a professional football team, are valuable to the player.

The weapon that is least needed is a rifle. A club or a sandbag or an Indian battle axe or spiked club is better. A good slinger without any weapon at all may take an adversary's loaded rifle and shoot him, knock him down and then kick him to death.

The monotony of trench existence these days is broken by preparing for raids and against them. Battalion commanders work out a plan of strategy which would have won them fame in smaller wars. Fifty men or a thousand may be engaged in a raid. It may be on a front of fifty yards or a thousand. Its object is to take as many prisoners and kill and wound as many of the enemy as possible in a few minutes; and then to get back to their own trench.

The assassins try to hold on to the piece of trench they have taken, the bombers close up on either side, and machine gunners are prepared to sweep the zone of retirement.

An uncanny curiosity gets the soldiers incentive for the raids. Ordinarily they never see their men hidden in their burrows across "No Man's Land" for a town or village. They have seen bullets from unseen snipers crash overhead. Unseen guns suddenly concentrate on their own trench. For months this sort of thing goes on and the trenches of the adversaries resemble one another in the same place; the grim monotony of casualties and watching continues. This arouses the trench raiders' sadistic. It means springing over the parapet and rushing across "No Man's Land" into the enemy's trench, and enemy man to man on his door step proving that is a better fighter.

To go over the trench and then means death. In order to make any such rush there must be "interference," as they call it, by the trench barbed wire in front of the enemy's trench must be cut. This is usually done by the gunners, who are more dead than in their ability to turn accurate sprays of destruction on given points. They cover the rush and they cover the retreat of the raiders with their prisoners.

But the guns are not all; there are all kinds of organized trickery in order to enable a body of soldiers to get into the enemy's trenches for a few minutes of action, and then to pull out. The British are very clever in this. They throw themselves on their invaders at such close quarters that it is a question if the enemy can get a practical weapon. It cannot be thrown over a traverse and a bomb can. Running in from the corner of a traverse a blow may be better than a shot.

There have been trench raids where every man who went out was responsible for a casualty or prisoner, where the raiders' own loss might have been one in ten to one hundred, and are also failures. Success requires that every detail should work out right. The British are very clever in raiding, which the Germans promptly adopted. Where its development will end no one dares venture to say.

Advantages of a "Bantam Battalion"

Out west they are raising a "Bantam" Battalion. It has already appeared in the vast "somewhere in France," and an officer referring to it, said that he was much struck by their sturdy appearance, their point of endurance he considered it not improbable that they would march an average new army battalion to a standstill. For trench warfare he considers that they will have a very distinct advantage over the British, and a particularly of the reckless type so familiar to platoon officers, who grow weary of retreating the injunction, "Keep down."

Overrated German Efficiency

German efficiency in warfare is a thing of the future. Its limitations are as obvious as those of an analytical conclusion. It solves a given problem, working out a plan of attack, and it is baffled by the unexpected and lacks imagination to foresee new conditions. It is a machine in a straight line, and when deflected by unconsidered obstacles which imagination might have provided for, it is like a locomotive off the track.—New York Times.

"Didn't Columbus discover America?"

"I believe so," said Mr. Dustin Stax, "but it took some of our financiers to allow what could be done with it."—Washington Star.

Landlady—What did the poet mean when he said, "The substance of things hoped for, the vision of things unseen"? Boomer—Hash, probably.—Judge.

## Escaped From Germany

Clear Grit Won Liberty For This French Officer

French journals print a remarkable account of a French officer who succeeded in escaping, after being severely wounded, from captivity in Germany. The officer, who was a captain in an African regiment, went through the battle of Charleroi in August, 1914, and a few days later, during the retreat, had orders to capture a German battery. During the charge he was wounded, and he was taken to a room. His men left him for dead after removing his papers, but he was picked up by the German Red Cross.

A week later he was suffering from pleurisy. Even after two months his wound was still discharging, and he was so weak that he could not stand. Day after day, with great difficulty, he regained strength by gradually increasing his food. The wound, however, grew worse and stopped washing, so as to be able to pass as a tramp. He got a girl nurse, gradually brought him civilian clothes, gave him money, and procured him a key of a secret door.

He escaped one dark night and, passing as a Belgian refugee, got rough farm work, and in return bought food and shelter. He was, however, re-wounded, and at all costs he had to get attention, so he forged a name and got into a hospital. There he found an old French doctor who treated him. He was employed in the lab in all sorts of odd jobs, as stableman, clerk, grocer, and so on. During this period all men between eighteen and fifty had to go before the military Governor, but he was not suspected.

In March, 1915, nearly cured the officer determined to get back to France. For this a passport was necessary, but obviously impossible to get. He had to approach the acquaintance of an old smuggler, who he persuaded to get him a passport. The smuggler got him a passport for a town near the frontier. He got into relations with a peasant, to whom he had an introduction, and who gave him a heavy coat to drive over the frontier. As the cart crossed it stuck in the mud, and a German sentry came up and searched him. He was released almost at once, and on his return to Paris he was able to give valuable information to the military authorities. Having already been decorated with the Legion of Honour, he was awarded the Croix de Guerre.

## Prince Edward in Cairo

The Prince of Wales' visit to Egypt resulted in many biggers to Cairo blessing his name, though he is ignorant of the fact. He was met by the Prince making some purchases in the bazaar, and when the business was concluded he approached the merchant and asked him if he knew whom he had had the honor of serving. The merchant, who had heard of him when informed of the truth he burst into loud lamentations. He had shamelessly overruled the Prince's wishes, and he could not suffer an ignominious death. The correspondent promised, if the German merchant distributed the goods to the poor in the Prince's name he himself would personally intercede with the Prince on his behalf. The merchant thankfully agreed.

Tommy to Jack, on leave—What about the lingo? Suppose you want to say egg over there, what do you say?—Jack—Egg over there, what do you say?—Tommy—But suppose you want to say Jack?—"Yes, say, 'Two oafs,' and the silly fellow will be sure to say 'Two oafs,' just give her back one. Man, it's an awful gae language.—Glasgow Herald.

## A Glorious Trinity

In an Ohio town is a colored man whose last name is Washington. Heaven has blessed him with three sons.

When the first son arrived the father named him George Washington. In due time the second son came. Naturally he was christened Booker Washington. When the third man child was born his parent was at a loss, at first, for a name for him. Finally, though, he hit on a suitable selection.

The third son, if he lives, will go through life as Booker Washington.—Saturday Evening Post.

## Germans Conceal Their Losses

M. Hilaire Belloc, the eminent military critic has, after a visit to Paris, where he examined the records of the War Office, compared the lists of German prisoners with those published in Germany, and with the private figures of villages where the prisoners hailed from. He also analyzed the figures issued by the British War Office, and reached the conclusion that 3,500,000 men had been permanently lost to the German fighting forces. In the last year, 1915, over 5,000,000 men of the original 10,000,000 maximum possible recruitment of German men effective for war.

"I gorry, I'm tired!" "There you go! You're tired! Here I be a-standin'—but I be a-standin'—and you workin' in a nice cool sewer!"

You can put all the United States except Alaska in Brazil and have 200,000 square miles left.

## Asquith Points

Way to Victory

Increasingly Close Co-operation and Vast Resources of Allies Bound to Triumph

In observance of the thirtieth anniversary of his election to the House of Commons from East Fife, Premier Asquith visited his constituency for the first time since the outbreak of the war, addressing a great meeting of his supporters and many who in private years, had been his opponents.

The Premier made a touching reference to the death of Field Marshal Lord Kitchener as "leaving a place in our constitutional life that none else can fill, and a memory that will live as long as the British Empire." Lord Kitchener had bequeathed to the country an army of armies, said the Premier, and it was for the country to make the best use of these.

In a survey of the situation, Premier Asquith declared that the Russian advance was one of the most brilliant of the war, and that the struggle of an army of armies, said the Premier, and it was for the country to make the best use of these.

The Italians, Mr. Asquith said, were making resistance to the Austrian onslaught which every day was becoming more effective. As for the French, nothing could exceed the valor with which they were maintaining the defense.

The General Staff of the allies was becoming more intimate and complete every month. British assistance, he declared, was being given in the steps which would be taken were these dictated by sound strategy.

The Premier closed his address by saying that the war was a struggle of material and economic resources, and these will prevail in the long run to be the deciding factors.

After speaking of the effectiveness of the navy's blockade Mr. Asquith said: "Owing to the rashness of the enemy we were allowed to see another and more stirring, dramatic aspect of the navy's qualities. The naval action of the 22nd October, 1914, was one of the most treasured traditions of the British navy. The Germans were driven into their ports without so much as making an effort to grapple with the main body of our Grand Fleet, and it is the tenacity to claim victory. A couple more such victories and they will be nothing less than a German navy worth speaking about. The navy is slowly looking out, and its full extent is not yet realized or appreciated. Our countrymen, on the sea, so far from being impaired, has been more firmly and unshakably established."

In reference to Ireland, Mr. Asquith said the recent rioting, leading to the loss of many innocent lives, had created a situation which seemed to a majority of responsible Irishmen of all parties to call for a settlement. The history of the relations between Great Britain and Ireland exhibited a tragic series of missed or misused opportunities.

"Don't let us add another to their number," said the Premier. "Where he desired, he explained, was a provisional settlement, for when the war came to an end the country would be divided into two parts, the British and the Irish, and the relations, the fabric of the Empire would have to be refashioned, and relations between the two parts would be a heavy task. The weather conditions and the Dominions would of necessity be brought into close and connected review."

The Lord Mayor of London will be coming to the city in a car, and some one to cook vegetables properly. Sir Charles Wakefield, an ex-mayor, endorses the same determination to get the city ready for the coming year in these times.

Valuable deposits of coal have been discovered in Nigeria.

## Wireless Saves Many Lives

The History of Marconi's Great Discovery is Short, But Most Dramatic

There is one man whose name stands out amid the conflict of the European war for what he has done to save life. While other destroy, he saves. And this man is Chevalier Marconi, who invented and perfected the wireless telegraph.

And this man is Chevalier Marconi, who invented and perfected the wireless telegraph. He belongs the credit of saving life over the world, since to his great invention thousands of people owe their rescue from maritime disaster.

The history of wireless telegraphy is still short. As recently as 1895 messages were first sent from England to France, while in 1902 the "waves" he had mastered, carried greetings between Canada and England.

The first case on record of "wireless" being employed by a ship in distress occurred on March 5, 1898. On this date the R. F. Matthews ran into the East Goodwin lightship during a heavy fog. The weather conditions would, in the old days, have rendered the work of rescue very difficult. It was the wireless telegraph, however, that saved the ship and its crew.

The history of wireless telegraphy is still short. As recently as 1895 messages were first sent from England to France, while in 1902 the "waves" he had mastered, carried greetings between Canada and England.

On January 23, 1900, just ten years after the case of the R. F. Matthews, a British ship, the Republic, off the Nantucket Lightship, was struck by a heavy fog. The ship was in danger of running aground, and the wireless telegraph was used to call for help. "C. Q. D." Through the wireless the ship was saved, and the Republic was able to return to port.

Sixty miles away was the Baltic.

## Bulgars Have

Set Example

Unlike Germans, Respected Red Cross on Lady Paget's Hospital

There was a large party at King's Cross to welcome the Bulgarians and other members of the Serbian Relief Fund Hospital staff at Uskub on their return to London. A well known member of Lady Paget's party said: "We have travelled back to England via Roumania, Russia, Sweden and Norway. On October 22 the Bulgarians entered Uskub. Their advance was so rapid that there was no possibility of getting the patients safely out of the hospital. Lady Paget pluckily decided to stay behind to look after them. The Indian staff went right through the hospital buildings, but the Bulgarians respected the Red Cross flag."

"There were 600 patients, about half of them being Serbs, and the other half Bulgarians. The Bulgarians, I believe, are very friendly and helpful. They told us they were anxious to stand well in English eyes. The refugee population, kept alive from the winter of 1914-15, numbered many thousands. Lady Paget organized daily relief for about 4,000 people."

King Ferdinand, and both the young prince and princess, were permitted to leave. None of them, however, came to the hospital. They were allowed to stay in Sofia for a month. Lady Paget was the guest of the Queen of Bulgaria. She allowed visits to the Bulgarians, and they all spoke well of their general treatment. Two prisoners were allowed to visit. Private Morris and Private Woodbine, the latter being blind."

## Many Officers

In Canada

Will be Sent to Summer Camps and Given Experience in the Handling of Troops

There are at present a little over 3,700 officers in Canada who are as yet unattached to any conditional unit, although they have been duly commissioned and have qualified. They are to be sent to summer camps, where they will be given opportunity to become regularly attached as commissioned officers.

A part of the surplus will be absorbed at once in making up the shortage of officers in the fighting of the Canadian Expeditionary Force. The surplus will be sent to summer camps, where they will be given opportunity to become regularly attached as commissioned officers.

The most of the surplus officers are in the infantry and artillery. There are some 3,000 commissioned lieutenants in the infantry for whom places cannot be found at present.

## Stating the Truth

"I thought you said if Mabel refused you, you would surely die!" "I did."

"But she turned you down, and you're still here!" "Yes, but I still expect to die some day."—Detroit Free Press.

## On Board were 2,201 Passengers

and while the vessel itself had cost over one million pounds to build. Yet in a moment she became a helpless wreck.

The wireless operator sent his call for help broadcast into the air, and it was answered by the Carpathia, which vessel steamed as quickly as possible to the scene. But before she had reached the scene of the disaster the Titanic had sunk. Out of the 2,201 passengers, 712 were saved from the lifeboats of the ill-fated vessel. And it is quite accurate to say that the Carpathia, with all the wireless telegraph, had not been in the water if not of these must have perished from exposure.

But it is not possible to mention even the most remarkable rescues effected by wireless. There was the Vulcan, which caught fire 1,000 miles west of the Irish coast, and in answer to the wireless appeal no less than eleven ships went to the rescue, saving altogether 521 lives.

Then again, when the Empress of Ireland was struck by the Storstad wireless call ended in the saving of 618 lives.

But the instances are endless. And the modern usages of war have multiplied them. Of this period nothing can be written, but it must wait till the coming days of peace.

But brief mention may be made of the Lusitania, when 704 lives were saved.

A word here as to the call used—"S. O. S." is not out of place. "C. Q." is the call for attention. It is adapted from the old "all stations," or general call of the telegraph. It was first used by the Wireless Congress it was suggested and approved that a better call was "S. O. S." which by its arrangement of letters and dashes is different from any other call.

"S. O. S." has no special meaning. It is the letters "Save our Souls" or anything else equally dramatic. This call is an international one, and the same meaning in all languages.

As the number of vessels carrying wireless equipment increases, so the peril of war grows less. Marconi has robbed the ocean of much of its terror. Old Neptune is slowly being muzzled.—From answers, London, 14, 1915.

## WHAT IS NEEDED TO CONVINCE

GERMANS THEY ARE DEFEATED

TAKING OF TOWNS WILL IMPRESS THE PEOPLE

For Which They Pay so Dear, Brings Them Nearer to Defeat, But Nation is Kept in Ignorance

Officer of Prussian Guard Believes That Each German Victory

Is in Proportion to the Losses Which They Suffer

Total Collapse of Austria-Hungary

In the Russian campaign are vital implications. Should the Russian hammer pound its way forward, it would suggest the approaching collapse of Austria-Hungary. The Hapsburg Emperor has in the field the maximum forces that he can summon. His resources are practically exhausted. If his armies occupying carefully fortified positions are not able to hold them, they are compelled to make a disheartening and material-destroying retreat. It is difficult to see how they can prevent the Russian advance. The Russian army is in the field, and might easily mark the final stage of the war. German command is in the hands of the Prussian army. Germany realizes that isolation would be fatal.

Russia has devoted a year to the recruiting and equipping of new armies. How many have been recruited outside Russia, but the operations in Asia Minor, have been quiet. New Russia is again on the march, the time and circumstances being chosen. It is not strange that report of defection comes from Vienna, for Vienna is able to create a diversion in the East, which will divert the strength of Austria-Hungary. Russia is very heavy.—From the New York Globe.

An Irish soldier had lost his left eye in action, but was allowed to remain in the service on condition that he have a glass eye in its place. Being a typical "absent-minded beggar," he appeared on parade one day minus his left "lamb." The general in command, seeing the man, said: "Nolan," said the officer, "you are not properly dressed. Why, if you are an Irish soldier, you should have a glass eye in its place. Being a typical 'absent-minded beggar,' he appeared on parade one day minus his left 'lamb.' The general in command, seeing the man, said: 'Nolan,' said the officer, 'you are not properly dressed. Why, if you are an Irish soldier, you should have a glass eye in its place. Being a typical 'absent-minded beggar,' he appeared on parade one day minus his left 'lamb.' The general in command, seeing the man, said: 'Nolan,' said the officer, 'you are not properly dressed. Why, if you are an Irish soldier, you should have a glass eye in its place. Being a typical 'absent-minded beggar,' he appeared on parade one day minus his left 'lamb.' The general in command, seeing the man, said: 'Nolan,' said the officer, 'you are not properly dressed. Why, if you are an Irish soldier, you should have a glass eye in its place. Being a typical 'absent-minded beggar,' he appeared on parade one day minus his left 'lamb.' The general in command, seeing the man, said: 'Nolan,' said the officer, 'you are not properly dressed. Why, if you are an Irish soldier, you should have a glass eye in its place. Being a typical 'absent-minded beggar,' he appeared on parade one day minus his left 'lamb.' ### SYNOPSIS OF CANADIAN NORTH- WEST LAND REGULATIONS

THE sole land of a family, or any made over to  
years old, may homestead a quarter section  
of available Dominion land in Manitoba,  
Saskatchewan or Alberta. Applicant must appear  
in person at the Dominion Lands Agency or  
Sub-Agency for the District. Entry by proxy may be  
made at any Dominion Land Agency (not  
Sub-Agency), on certain conditions.

Duties—Six months' residence upon and cultivation  
of the land in each of three years. A homestead  
may be fire within nine miles of his homestead  
on a farm of at least 80 acres, on certain conditions.  
A habitable house is required, except where residence  
is performed in the vicinity.

In certain districts a homesteader in good standing  
may pre-empt a quarter-section alongside his homestead.  
Price \$100 per acre.

Duties—Six months' residence in each of six years  
after earning homestead patent; also 30 acres extra  
cultivation. Pre-empt patent may be obtained as  
soon as homestead patent, on certain conditions.

A settler who has exhausted his homestead  
right may take a purchased homestead in certain  
districts. Price \$100 per acre. Duties—Must reside  
six months in each of three years, cultivate 30 acres  
and erect a house worth \$300.00.

The area of cultivation is subject to reduction in  
case of rough, scrubby or stony land. Live stock  
may be substituted for cultivation under certain conditions.

## What The Huns Would Do

Germany's Idea of the Meaning of the Freedom of the Seas

The "freedom of the seas" that Germany wants is freedom to paralyze the sea-power of the maritime States, and first of all the sea-power of England. That, as she well knows, was the inevitable obstacle to universal overlordship against which Napoleon, who "was her oppressor, and is her model," dashed himself in vain. Were it removed from her path by the "reforms" she advocates in international law, she would be free to pursue her ideal well-nigh unchecked.

We know what that ideal is. We have learnt it from her speakers and writers, but most from her actions. It is a German domination in all branches of human activity, founded upon the brute force of a vast army which is moved by an autocratic government. Does any man fancy that, if Germany had the power upon the water that she has in Belgium, and in Poland, she would not use it with the same unscrupulous ruthlessness? Would there be fewer Lusitanians and fewer Sassenachs when she was strong than when she was weak?

She would bind herself, no doubt, by solemn treaties, but she would keep them as she kept the ones that pledged her to defend Belgian neutrality and the others that bound her to sink merchantmen at sight. That consideration alone must constrain maritime nations. England and America, to relate the fleets. Did they foolishly reduce their navies Germany might at any moment constitute a new naval system that "freedom of the seas" and destroy their trade on that plan of military necessity which justifies all lawlessness and all wickedness in her eyes.—London Times

Most infants are infested by worms, which cause great suffering, and if not promptly dealt with may cause constitutional weakness. The best remedy, Miller's Worm Powders will clear the stomach and bowels of worms and will so act upon the system that there will be no recurrence of the trouble. And not only this, but they will repair the injuries to the organs that worms cause and restore them to soundness.

## Cropsless Lands

Solving the Settler From Taking up Homesteads on Land Unfit for Agriculture

The opening up of non-agricultural lands to settlement has produced many of the ills of the Dominion's history. Every province has communities that have been ruined by the make the fatal error of a bad location. Their subsequent history is an unbroken line of bad crops, poor crops, and finally, ruin. The policy now to move away, the farmer and his family resign themselves to a life of poverty and struggle, and the efforts for practically no return.

Every province and the federal authorities have such lands. In the past there is no satisfactory evidence that a general and complete reform has been effected. Farmers and provincial "homesteads" which are impossible for field crops. The policy now to move away, the farmer and his family resign themselves to a life of poverty and struggle, and the efforts for practically no return.

Several survey parties are engaged on soil examinations this summer and such work is bound to achieve higher importance in the eyes of governments. One party, composed of Messrs. J. C. Munick of the Commission of Conservation and Walter Graham of the Experimental Farm, Ottawa, are in New Brunswick, co-operating with the provincial government in a scheme of land classification. The project deserves the hearty support of conservationists everywhere for the benefits are far from local.

The Sacred Bridge of Pekin, which a few years ago, no one was permitted to tread upon, is now open to the public, and is used by the Chinese pedestrians.

A Pill That Lightens Life.—To the man who is a victim of indigestion the transaction of business becomes an arduous task. He cannot concentrate his mind upon his tasks and loss and vexation attend him. To such a man Penick's Vegetable Pills bring relief. A course of treatment, according to directions, will convince him of their great excellence. They are confidently recommended because they will do all that is claimed for them.

Water—Yes, sir, omelettes has gone up on account of the war. Dinner—Great! So are they throwing eggs at each other?

Gloves With Fingers.—It was in the year of the century that gold-time with separate fingers was first worn.

Visitor—But whether induced you to take up safe-cracking for a living? "Oh! I don't, lady. I guess I had a natural gift for it."—Laf.

A cat can turn completely over and land on its paws in a fall of fifteen inches.

Parents!

You may rest assured of one thing, Cowan's Maple Buds will not harm your children—buy them for yourself and yours.

A-10

## No Need For Crop Failures

Success For Next Year's Crop Depends on the Preparation Made This Year

"Only very rarely indeed need any farmer have a really poor crop, much less a total crop failure in Canada," says J. H. Grisdale, director of the Dominion Experimental farms. "The Canadian farmer will do his work wisely and well each year and all the year around need seldom or never fear that a crop, far to go at least, and usually excellent, will generally reward his well-timed and well planned effort."

In his advice to farmers, Mr. Grisdale declares that, "if you really want a good crop in 1917, now is the time to plan and prepare. The success of any year's work on the farm depends in no small measure on the preparation made therefore the previous year."

"You can do very little now to affect the yield from your fields in 1917, save only the local crop of one kind or another, but you can do and should do very considerable in the next few months when the power of properly preparing for, and so ensuring, good crops in 1917. While harvesting this year's crop must take place, these operations can be so conducted as either to improve or injure the prospects for the next year's crop."

When, again, a few hours' attention in July to weed-cutting around fences, spading in grain fields, and particularly hedges and cultivating the corn and root fields and cleaning the summer fallows will do more to ensure good crops next year than many days hard work now spring when the chances are you will be just as busy as you are today, if not even more rushed. Doing things when the cost of the work is lowest, as judged by the results, is the right way to farm, and the only way to farm if one wishes to be sure to profitable returns year after year.

The farmer who regretfully says, "A poor crop this year! Oh, well, a better one next year!" may be a bit of a philosopher, but he is not much of a farmer unless he gets his hands and tries to find out why the "poor crop this year" and what he must do to avoid such a result under similar or worse conditions in the future."

## Delicate Young Girls, Pale, Tired Women

There is no beauty in pallor, but plenty of weakness. Exertion makes your heart flutter, your head aches, and your nerves need something to put some ginger into your system. Try Dr. Hamilton's Pills; they make you feel better, make you want to do things, they refresh and purify the blood—then come strong nerves, rosy cheeks, laughing eyes, and good health. Dr. Hamilton's Pills, which are an old family remedy, cure a great many thousands use no other medicine and never have a day's sickness of any kind. Get a box today. Sold by all dealers.

## Origin of Wood Pulp Paper

A writer in the "Newcastle Chronicle" says that an old hornet's nest caused Dr. Hill, of Augusta, Maine, to make the discovery. "A bee recovered," the writer says, "and neighbor had told him there was not enough cotton and rags in the world to supply the newspapers and other publications with their raw material. That was about forty years ago, and Dr. Hill took a hornet's nest to the neighborhood of a nearby factory and asked him, 'Why can't you make paper like that?' They sat down together and took the nest apart carefully, and decided that if a hornet could make paper out of wood, man ought to be able to do so much. The doctor discovered that the hornet first chewed the wood into a fine pulp. They decided to make machinery and water to what the hornet's mouth did. Such was the beginning of the wood pulp industry."

## Minard's Liniment Cures Colds, Etc.

Safety First

In "Farm and Fireside" is an account of the simple method that ought to be employed everywhere by which a farmer saved his life. "One pair of water standing at the foot of a ladder leaning to the hayrack, saved our lives," we read. "Lightning struck the barn, killing two calves, then ran along to the top of the hayrack. My husband grabbed the pole and ran up the ladder in time to put out the fire, but if he had had to wait to draw that water it could have been too late." So if fall protection is not possible, don't neglect to keep a few pails of water handy.

## The Saturday Holiday

The beginnings of the Saturday half-holiday might be traced to an old-time custom among Southern planters. "On Saturday's," says Professor Sanford in "The Story of Agriculture," "for either the whole part of the day, the slaves were released from field work. In many cases they used this time and Sundays in which to earn money for themselves by hiring out and doing odd jobs. There were many instances in which slaves purchased their freedom and that of their families with money earned in this way."

## The Memory of the Dead

In several cities in Canada there are monuments to local heroes and a fell in the South African war and generally a small bronze plate is fastened to contain the names of the fallen. The monuments that will rise when the present great war is ended will be different in that respect. The only fall in one encounter today would cover the base of the largest memorial now standing.

## Angry Dinner—Waiter, you are not fit to serve a pig!

Waiter—I'm doing my best, sir!—Pall Mall Gazette.

## NO ALLOY

MAGIC BAKING POWDER

MADE IN CANADA

Horse Prices Upward

Good Prospects Ahead for the Horse Breeder in Canada

"The demand for horses in Canada," said Live Stock Commissioner John Bright recently, "has already stiffened considerably and I look forward to a gradual return to good prices."

When the panic of 1912 struck us, as the banks shut down, the horse breeders were almost the first to feel the pinch. There was nothing to do but to stop breeding. In 1913, the tendency increased, while 1914 and 1915 were worse, so that there is a dearth of foals this year, and a decided scarcity of one-year-olds and two-year-olds. Breeding will come back slowly, so that it will be at least four years before the foals of this year come on the market. This means a ten-year rise in horse prices.

"I remember about 1902 when horses were at a low ebb that I was offered on my farm at Myrtle, but \$40 for a fine yearling colt, and I was not interested, and of fair conformation. I kept her. Inside of eight years I raised a fine yearling colt, and sold at 10 years for \$250. Later when horses were at their highest prices I sold a filling rising two years for \$250, not better than the one I was offered \$40 for in 1902."

In good times, a great many breeders are foolish. They hang on to good stock, refuse good prices, pay out big fees, and even mortgage their farms to feed their stock, until a change comes, and they find their business ruined, their farms gone and the stock sold at a mere pittance for the needs of the arsenal. Revolutions have given a fair working price, and horsemen should be well advised to remember past experiences in future bright spots in horse prices.

"To me there is nothing but hopefulness ahead for the farmer who has a good horse, and the remedied world."

## Canada's Supply of Nickel

Rich Deposits in Cobalt District of Great Value to the Empire in Time of War

When the supply of nickel has become one of the foremost needs of the Empire it is well to recapitulate the resources of the Canada holds of the coveted metal.

The total production of matte at Sudbury, Ont., in 1916 was 67,200 tons containing 29,216,165 pounds of copper and 68,077,823 pounds of nickel, and 500,000 pounds of cobalt.

The tonnage of ore smelted (part being previously roasted) was 1,272,233. The production in 1914 was 46,300 tons of matte containing 28,806,235 pounds of copper and 45,577,337 pounds of nickel, and valued at \$1,438,000.

The production of nickel from the ores of the Cobalt district was 55,225 pounds of metals, and 200,000 pounds of matte.

The recovery in 1914 was 502,572 pounds of nickel oxide. About 60 per cent of the Canadian nickel production is exported to the United States, and a far larger quantity of nickel finds its way to the United Kingdom through United States refineries than is exported directly from Canada.

The Canadian Government have an agreement from the U. S. under which there is a practical certainty that none of our nickel goes to the enemy.

## Outlook For Heavy Horses

The more judgment exercised in breeding the better it will be for the country. For the last year or two there has been a slump in prices and, it is feared, less breeding than formerly in consequence. As a result, when the increased demand, which transactions, especially in the west, would indicate has already commenced, arrive at its fullness there will be both high prices and a marked deficiency of the required stock. By this, coupled with the fact that the vastness of horses in the war has been enormous, it would seem worth while to improve and regenerate horse breeding along with general agricultural production.—Ottawa Bulletin

## The Worst Is Yet to Come

"Hell let loose," says Vorwarts, the organ of German socialism in describing the food riots in Berlin. It may be exaggeration. Even if true, however, it is nothing compared with what is going to "break" in the still deluded German people come to fully realize the extent of the crime running against them by Prussian Junkers.—New York Herald

## The Old Gentleman's Wife

The old gentleman's wife was getting into a carriage, and he neglected to assist her. "You are not as gallant, John, as when I was a girl," she exclaimed in gentle rebuke. "No," was his ready response, "and you are not so buoyant as when I was a boy."

## Tea in Burma

Most of the tea raised in Burma is pickled and eaten as a condiment.

## Woman Found

In a Zeppelin

What a French Officer Saw in Burning Wreckage

Among the interesting statements gathered at Revin by the correspondent of the "Petit Parisien" regarding the capture of the Zeppelin brought down in flames by the French is that of an inhabitant of the region whose evidence suggests that there was a woman on board the airship.

"I was scarcely more than twenty yards away among the people crowded round the burning mass of the monster sky-rider," he said, "when I saw a French officer, whom I knew, scrutinizing through his fieldglass a particular heap of burning wreckage, the flames of which lit up the night."

"He handed me the glasses, exclaiming, 'Look, there is no mistake, about it, a woman was with them.'"

"I could plainly see through the glasses two slender feet shot with high-topped, high-heeled fashionable boots. They were undoubtedly the feet of a woman."

## NO MEDICINE AS GOOD FOR LITTLE ONES

Once a mother has used Baby's Own Tablets for her little ones she will use nothing else. The first few doses make her realize there is nothing to equal them in making baby well and keeping him well. Concerning them, I always keep a box in the house. "I have used Baby's Own Tablets for the past ten years and have found them so good for my little ones that I always keep a box in the house." The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

## Verdun

"It will, however, only be in retrospect, when the war is over, that we can fully appreciate the part played by the army of Verdun and its contribution to the general result. We cannot yet be sure of the exact reason, or balance of reasons, for the German choice. There were certainly dynastic and economic, as well as military reasons. The many failures of the German Crown Prince had to be redeemed, and the idea that a striking victory here would confirm and extend Germany's hold upon the mineral basin of Lorraine, which is essential to her iron and steel manufacturing, was probably not foreign to the decision. Among military reasons, probably the strongest was that the British had given a knock-out blow, whereas another thrust into Russia would not be decisive, even if successful, and any success upon the British front in France was highly problematical."—G. H. Ferris in London Chronicle

## Pulling "Bismarcks" to Pieces

The latest war auxiliary in Germany is the de-coopering of statues for the needs of the arsenal. Much adverse and unprintable comments have been passed because some corporations have been violent hands upon Bismarck monuments. Replanning copper with iron has been taken as an ill omen. One paper went as far as to hint that the statue against the clock, "Oh for an hour of Bismarck!"

No German officer or soldier is allowed to spit. Turkey will be enlisted in the Turkish army and damned the uniform of the Sultan's brass band. As a result, he will listen to advice from the Germans, but professes to take no commands from them.

Lake Tanganyika, which has been frequently mentioned of late in connection with General Smuts's campaign, is 2,700 feet above the sea. It is about 400 miles long, indented by capes so that steamers take three days to go from one end of the 400 miles to the other.

## Customer (in barber's chair)—So you haven't heard Von Thumper, the famous pianist? Barber—No, I haven't. I've never patronized him. I'm a Jew.

## Furniture Storage Famine

Problems in Great Britain are as thick as Scotch thistles on a bleak farm, owing to the war. One of the minor problems is the storage of furniture. Since conscription was passed and married men have gone to prepare for service, thousands have had their furniture stored. Now there are no depositories for storage, and as everybody is busy with work that is more important many people are experiencing unexpected hardships.

"Such a vicious temper! Where did the child ever get it from—not from me in sure," grumbled Mrs. Perkins.

"No my dear," replied Mr. Perkins, "you certainly haven't lost any of yours."

## Liver and Specks before the Eyes

Liver derangement is the cause behind these distressing conditions, and only restoration of perfect natural action can effect lasting cure. That is why Dr. Cassell's Instant Relief is so immeasurably superior to the old-fashioned cathartic liver-pills and aperient salts. Such things can only give passing relief by forcing the liver to unnatural action, and have to be continued. Dr. Cassell's Instant Relief strengthens the liver, and so brings about natural action in a natural manner.

Take Dr. Cassell's Instant Relief for constipation, biliousness, torpid liver, sick headache, dizziness, specks before the eyes, flatulence and windy spasms, acidity, heartburn, impure blood, and that dull, heavy feeling which is a sure indication of liver trouble.

Take Dr. Cassell's Instant Relief for constipation, biliousness, torpid liver, sick headache, dizziness, specks before the eyes, flatulence and windy spasms, acidity, heartburn, impure blood, and that dull, heavy feeling which is a sure indication of liver trouble.

Ask for Dr. Cassell's Instant Relief and take no substitute.

Price 50 cents. From all Druggists and Storekeepers, or direct from the Sole Agents for Canada, Harold F. Ritchie and Co., Ltd., 10, McCutcheon-street, Toronto. War Tax 2 cents extra.

Dr. Cassell's Instant Relief is the companion to Dr. Cassell's Tablets.

Sole Proprietors: Dr. Cassell & Co., Ltd., Manchester, England.

### Outlook for Record Prices for Livestock

WERE NEVER BETTER

The outlook for record prices for livestock were never as promising as at the present time, is the confident opinion of Hon. Duncan Marshall, minister of agriculture, who passed through Calgary last night on his way from the east, where he had been on private business for the last three weeks.

Mr. Marshall attended cattle sales in the United States and Canada. He was at the sale of Thomas Stauton of Wheaton, Illinois, which is a record. Twenty-six animals sold at an average price of \$1,200. These were all Canadian bred cattle fitted in Illinois. He also attended the sale of Carpenter & Ross, Illinois, where 66 animals averaged \$1,000 a head.

Two or three buyers from Argentina caused the stirring in the prices. Heretofore they have bought in Scotland, where they sometimes paid as high as \$1,500 guineas for an animal. This year is the first time that Argentine buyers have been in America. Of course, these buyers only want the very choicest, but it will have an effect on all, Mr. Marshall believes.

Mr. Marshall also referred to the exchange of judges. Prof. Curtis of Chicago and Robert Miller of Stouffville going to Argentina, and two Argentine men coming to America.

Mr. Marshall saw men refusing 11 cents for steers on the Toronto market, and farmers are getting \$10.25 on their farms.

Mr. Marshall got two carloads of animals for his own farm. While in the east he appeared before a meeting of the railway commission to discuss freight charges on refrigerator cars.—Morning Albertan.

It is perhaps worthy of note that these cattle were originally bred in Ontario and were exported to Illinois, with the above splendid results. There is no reason why this cannot be duplicated in Alberta, and more particularly in our own neighborhood where the conditions for such a project are ideal in every respect.—Editor Chinook Advance.

THE HAIL INSURANCE BOARD OF ALBERTA.

J. H. Lamb, Sec.-Treas.  
Edmonton, Alta.

### School and Equipment for Sale

I HAVE been instructed by the Board of Trustees of Popular S. D., No. 2613, to offer for sale the following property of the said district: The School Building, which is large and well-built—has a neat cold-shed behind—would be a good investment for a neighboring district requiring a school or a church; or with but little extra cost it could be made into a fine dwelling.

A Stable, large enough for 8 or 10 horses.

Two good Closets, with screened approaches.

Fencing, 7 or 8 stout cement posts, large and small iron gates, cedar posts, and woven wire enough to fence 2 acres, some of the wire never been unrolled.

Teachers' desk, office chair, 2 other chairs, about 15 desks for pupils, large map case and maps, library case and library, reading tablets, large bell, blackboard, etc.

Waterbury Heating System, good as new.

A Good School Organ, in use but a short time.

Two screen doors—never been used; coal and kindling.

Everything must be sold. Tenders will be received for all or for any part of this property. If tendering for more than one part of it, state how much you will pay for each part. In this way all will have a fair chance. Tenders must be in before June 30th. The highest nor any tender not necessarily accepted.

LORNE PROUDFOOT,  
Secretary,  
Chinook, Alta.
